

Featured TLO Projects

Cultural Enrichment for Engineering Students while Performing Research in Germany

Dr. Daniel Cox and six UNF engineering students traveled to Cologne to conduct research on a National Science Foundation grant. This TLO provided additional opportunities for the students to become more engaged with the citizens and culture of Germany.

UNF Chemistry Research Presented to the American Chemical Society National Meeting

Eric Dornshuld, James Vickers, and Angela Miguez, of the Team Vergenz chemistry research lab, presented their research at the ACS conference in Philadelphia in August. Students were selected based on the readiness of their work, and also on whether they had previously had such an opportunity.

Urban Education in America: Origins of Democratic Equality in Schools

In July 2008, Dr. Carolyn Stone and a group of 21 School Counseling graduate students traveled to New York City to participate in an experiential, urban schooling immersion field experience. This TLO project gave students the opportunity to engage in collaborative, constructive learning activities that focus on resource-challenged public schools in New York City.

UNF Wind Ensemble: Carnegie Hall

Dr. Gordon Brock and the UNF Wind Ensemble were awarded the opportunity to perform at Carnegie Hall during the Spring 2008 concert season. Securing a performance at Carnegie Hall endures as one of the true benchmark achievements in the career of any musician.

Service Learning in West Africa

In Summer 2009 Honors Program students will participate in a service learning study abroad trip to Ghana led by Ms. Marcia Ladendorff. This is the 2009 version of the Ghana TLO experience conducted in Summer 2007. During the trip the students will be engaged in a week-long service project where teams of students work with local people on community projects.

A TLO in Belize CA for Undergraduate and Graduate Nutrition Students

Dr. Judy Rodriguez, Dr. Cathy Christie, and Dr. Julie Watkins led a group of undergraduate and graduate students to Belize for this two-week study abroad course. Students were able to participate in activities related to community assessments, cultural food habits, multicultural counseling skill development, nutrition diagnosis, and medical nutrition management.

Welcome

Dr. David Jaffee

Assistant Vice President for Undergraduate Studies

Dr. Dan Richard

Interim Director, Office of Faculty Enhancement

Presentations

Cultural Enrichment for
Engineering Students
