Notes from
What Do You Do with your IPAD? Session

- Get a My Dropbox account or an application to store documents
- Apple sells a converter for a projector if you want to use the iPad for lecturing from the podium.
- You can do remote desktop-JUMP is one application to do this, iTap RDT, Jump is better for control.
- CIRT has wifi only but there are 3G models where you buy a plan so you have wireless capabilities or use the wifi model and buy the wireless app. Must have ATT, month by month, and it is like $14/month
- Current models range from $500-800. They are not discounting for educators.
- Can use an external apple keyboard, around $40 bucks. Camera connecter is to connect your camera and upload your photos.
- Some apps are universal for both the iphone and ipad, you won't have to buy it for both. Jump is universal.
- **Mobile Learn** is the application to access Bb. iPad version is very helpful as it seems more useful and friendly than the Bb itself.
- Organizing PDFs and using for it for research-do this by downloading My Dropbox.
- **Good Reader** or **iAnnotate** will allow you to organize pdfs, highlight, write notes on it. You still must email it to yourself if you want to store it on your laptop. Otherwise you can store it in this application. You may also connect with existing hard drives that you have on your computer instead of using these other applications.
- **Notetaker high def** **/** skihigh (? Couldn't find) **/** **penultimate** allows you to write notes and shrink it to the size you want, email to yourself and store.
- **iWorks** is the name of the suite that contains all of these items:
    - **Pages** equal to word, **numbers** is excel, and **keynote** is powerpoint.
- Turns on immediately (don't have to wait for it to startup), lightweight, convenient
- iworks applications have a feature that allows you to upload or email documents in a variety of formats.
- WebDav will allow you to upload to UNF drives- ITS is working out the bugs in this process and will make directions available in the near future.
- has the notes feature that allow you to upload the notes immediately to our servers
- Flipbook is a free social networking tool for viewing FB, Twitter, Myspace ,etc that won't distort the images, etc.
- Notes for To Do Lists are good to use with the **TaskTask HD** application. It sinks with Outlook Exchange. If you flag emails it will sink with the TaskTask HD.
- ITS and CIRT will write up instructions on how to do most of this.
- How does the University pay for apps?
    - You buy and can get reimbursed for it.
    - ASK FIRST.

- o Apple came out with a bulk license feature that you can call ITS and they will provide you a key. Don't have now but they are looking into it. It will depend on the demand. Look for information on it thru CIRT and ITS
    - Remote desktop
    - Goodreader
    - Parts of Iworks (pages, numbers, keynote)
- **DOWNSIDES:**
    - o Certain areas where you are not going to get wireless (4th floor of the library for example).
    - o Multitasking is certainly a problem. You can use tab browsing to help alleviate that problem. (click on safari and see all the pages)
    - o Next version will actually address the problem of multitasking.
    - o Major drawback doesn't' have a port for external storage but you can use a dropbox (external application).
        - No USB port but has a doc adaptor that may be able to be hooked up/converted to a usb port. Not certain this exists but the talk is that it is out there or going to be out there.
    - o Can't track changes, no statistical software apps.
    - o Can't use a webcam for live conversation
