

The Osprey Journal of Ideas and Inquiry

Volume IV
Spring 2005

Mary O. Borg, Editor
Karin Kovacova, Student Editor

Editor's Note:

The fourth annual issue of the *Osprey Journal of Ideas and Inquiry* would not have been possible without the generous financial support of the Office of Academic Affairs at the University of North Florida. Provost Gerry Giordano has been instrumental in supporting the Undergraduate Research Program and the journal that results from it.

I would also like to thank the University of North Florida Trustees and the UNF Foundation Board. Their generous financial support has made the Undergraduate Research Program and this journal possible. The *Osprey Journal of Ideas and Inquiry* is a tangible sign of their commitment to a first-class undergraduate education for our students. Whereas many universities are only beginning Undergraduate Research Programs, UNF's has become an institution.

My deepest gratitude goes to my student editor Karin Kovacova, a 2003 graduate of the University of North Florida who is currently pursuing her Masters of Business Administration at UNF. Karin has devoted countless hours to editing the journal, preparing the graphs and pictures, and seeing the project through to completion.

Mary O. Borg, Editor
Professor of Political Economy
Director of the Undergraduate Academic Enrichment Program

Contents

Natural Sciences/Health Sciences

Daniel Arenas and Dr. L.V. Gasparov

Magnetite: Raman Study of the High-Pressure and Low-Temperature Effects

Peaches Marie Raval Orallo and Dr. Michael Lentz

Analysis of Papilloma Virus E1 Protein: Creation of Stable Cell Lines to Generate Sufficient Amounts of Viral E1
