

UNF Board of Trustees

October 18, 2007

Issue Tenure by Reason of Appointment

Proposed Action Approval

Background Information

The tenure nomination before the Board of Trustees is being recommended under the tenure by reason of appointment procedures. Under these procedures, the administration recommends awarding tenure to Dr. Courtney Hackney, Department of Biology, College of Arts and Sciences.

Dr. Hackney is to be appointed as a tenured professor of biology and director of the newly formed Coastal Biology Program, effective January 2, 2008. This is one of our flagship programs. As evidenced by his vita, Dr. Hackney has a strong national reputation.

This item was presented to the Educational Policy Committee and received a motion for approval to the full Board.
