

UNF Board of Trustees

October 18, 2007

Issue Traffic and Parking Regulations

Proposed Action Approval

Background Information

These regulations are being presented to the Board of Trustees for approval. The revisions in these regulations add some instances when parking boots can be used on vehicles as well as when permission to park on campus can be revoked. The changes also move date and time information from regulations to the web, allowing for term-to-term modifications, as well as allowing the Board to change amounts charged for parking annually without changing regulations. Other revisions cover procedures that are current practices which are not as of yet specified in regulation format.

These regulations received a motion for approval to the Board from the Finance and Audit Committee and will be effective immediately upon approval.
