Issue: Limited Access Program Request

Proposed action: Approval

Background information:

This request from the College of Arts and Sciences asks for approval to make the B.A. in Liberal Studies a limited access degree program. Adding the designation of limited access is intended to signal to students the program's intended use for exceptional and highly motivated students interested in a major outside of conventional disciplinary boundaries rather than merely a collection of unrelated courses. It has been reviewed and recommended by the Educational Policy Committee.
