

BOARD OF TRUSTEES

October 20, 2005

Issue: Traffic and Parking Regulations

Proposed action: Approval

Background information:

On July 21, 2005, the Florida Board of Governors adopted a new university regulation development process. Under the new process, there will no longer be promulgation of rules. The Florida Board of Governors has approved the "Regulation Development Procedure for State University Boards of Trustees" for the processing and adoption of university regulations (formerly rules). When a new regulation is proposed or an existing regulation is revised or repealed, it will be announced by way of the Campus Update and electronically posted via the University website. There will be a 14 day opportunity for comments. All University regulations will require approval by the full Board for adoption. Select regulations are regulations that include: tuition and fees, admissions, and articulation, which require approval by the Board of Governors.

The former traffic and parking regulation considered both subject matters as part of the same regulation. The newly proposed regulations set forth current language to distinguish the two subject matters and ensure that the regulations are consistent with University policy and procedures.

The regulations are being presented to the Finance and Audit Committee for review and recommendation to the full Board. The regulations will be effective immediately upon approval by the Board of Trustees.
