UNF Transformational Learning Opportunities

2012 School of Computing TLO Summer Internship Program

Gain real-world computing work experience.

A great way to spend your summer by helping non-profit organizations.

Earn a stipend of $1000 as scholarship award in Fall 2012.

School of Computing is offering up to TEN summer internship positions for undergraduate junior-level students to develop basic Web site presence for non-profit and small business community partners.

Interns will spend five weeks from June 25 to August 3, 2012. In the last week of June, students will be trained to use content management system to develop web sites. In the first week of August students will make a presentation on their internship outcomes. Month of July will be used for meeting with community partner and developing a web site meeting their requirements.

During the internship, students will:
• Work in small groups and with faculty mentors to complete a Website development project
• Gain experience on content management systems, Web site development, and real-world project experience
• Participate in weekly meetings with community partners and faculty mentors
• Present the completed Website to general audience

Eligibility to work as intern:
• Must enroll in Fall 2012
• Must have taken Web Access and System (COP 3855) or Internet Programming (COP 4813)
• Previous experience with Website development via work or class project

Interns will receive a stipend of $1000 as scholarship award in Fall 2012. Interns will need to provide their own transportation for traveling to community partner location.

Deadline for internship application is April 15, 2012. The selected students will be contacted via email by May 15, 2012.
For more information about the internship position and for the internship application, visit: www.unf.edu/uploadedFiles/aa/ccec/ComputingNew/UNFTLO-2012summerApplication.docx

These summer internship positions are funded by the UNF TLO funds. If you have questions about the program, please contact Dr. Karthikeyan Umapathy (k.umapathy@unf.edu) and Dr. Ching-Hua Chuan (c.chuan@unf.edu).
