

Objective: Host a community sponsored event for UNF students to showcase their programming and development skills.

Participants: UNF Students from the CECC

Duration: 10-12 hours

Time: 8am – 6pm

Date: March 25th

Location: UNF School of Computing rooms 3120 & 3122

Estimated Participants: 32 (8 teams of 4)

Description: This creatathon event will be a community inspired hackathon where teams of up to four students showcase any skills they have obtained and refined to create a programming a mobile application, website, system, or general program around a pre-selected theme. Students will learn of the event theme the morning of and have 10 – 12 hours to develop their product and have it ready to present at the end of the creatathon to our panel of judges. The judges will score the final product by the quality of the user interface, ingenuity, and overall use worthiness.

We hope this will give UNF students a prime opportunity to show what they have learned not only with in the School of Computing but during their own free time. This event will differ from traditional hackathons in that we hope to stress the creativity of each individual student and get them excited and emotionally invested in what they are working to create. By fostering this kind of even within our school we hope to inspire our students to keep creating and developing during their own time at home during the week or weekends.

Prizes:

1. Scholarship award
2. Raspberry Pi Ultimate Starter Kit
3. Raspberry Pi

Judges:

1. Micah Cooper – Hashrocket
2. Jared Wheeler – Beeline
3. Melissa Hong, CEO – Visual Solutions
4. Michael Potts, CEO – feature[23]

Congratulations to our winners!

First Place: Team Jon (Jonathan Phillipps)

UNF Glances brings easy access to UNF's Master Calendar to the iPhone, in an Apple WatchOS style. At a glance, users can view the Academic Schedule for fall, spring, and summer, Continuing Education, All Events, Featured Events, and Todays Events. A highly configurable settings pane is integrated into the iOS settings app to allow users to customize the glances to their liking.

Second Place: Platypus Bacon (Ryan Cannon, Frankie Stiers, Amanda Davis, Gary Frazier)

EventME is a web application that allows users to create and join events.

Third Place: Average Joes (Nagavarun Kanaparthi, Zachary Harwood, Ismael Texidor-Rodriguez, Jeremy Cantor)

Initiative Starter is a web application to bring UNF students together on student driven initiatives. This application is meant for students to communicate problems and work in collaboration on initiatives no matter what college within the university they attend. These initiatives can range from problems in the Jacksonville community, gathering interest for student driven research and just any creative idea that the students can think of!
