Jun 9, 2015 12:24 PM	Very helpful in creating a framework for my class. Labs worksheets were very helpful. The PowerPoints were a good starting point, but required an enormous amount of time to fill them with enough content (and notes) to provide an adequate lecture. The exams were very helpful. There were some questions that seemed to be very detailed but were not explicitly covered in the PowerPoints. But it did save me a lot of time having a framework for the exam to work with.
