17. Of all the courses that you have taken in your major, which have been the best and why?

Text Response

Communication and counseling with Ms. Ross. She can give true real world examples and suggestions

Bio organic chemistry was the only class I was actually forced to challenge myself and learn difficult material. I also learned a lot from Nutrition Counseling and how to apply the concepts we have learned to a clinical setting.

Medical Nutrition Therapy and Nutrition Counseling, because I feel they have both prepared me the most for my future career as a Registered Dietitian.

Community Nutrition: I took a part in the nutrition community and was the only student to take a part in the Fuel-up to Play 60 program / Field for Food Prep: This class allowed me to work within my UNF community with other students in different majors. I enjoyed it immensely

Nutrition Counseling and Communication because it isa excellent segway into the career field and sheds light from a different perspective of Nutrition and Dietetics.

Counseling, this class taught me skills for what I plan to do in the future.

Medical Nutrition Therapy II and Bioorganic Chemistry. The Bioorganic course provided me with a better understanding of the processes that occur during metabolism and the MNT courses helped elucidate the field of Nutrition and Dietetics for me.

Medical nutrition therapy because I feel that I learned the most and it was the most important class to prepare me for my future.

I have a minor in Psychology. Some of our psychology courses overlapped with the nutrition program study, which I thought was interesting considering I dont remember learning anything that would relate to nutrition and dietetics.
