

Currently there are numerous online libraries and bookstores that distribute freely or sell eBooks. These books range from copyright free texts that include much of classic literature, science and philosophy to current best sellers, reference books, and instruction manuals. A teacher should easily be able to find eBooks related to their content area that could be given to the students at no cost. For example the complete works of William Shakespeare are available to download from University of Virginia's E-Book Library or from Project Gutenberg. These works could be distributed to the students and an instructor could use any sections that they needed without worrying that students brought the wrong books with them. Students could have to text read aloud by the device to improve comprehension. Instructors could download the texts and add their notes, advance organizers, comments and questions to the texts before converting them to an eBook format. As the material is in electronic format, students have the ability to copy and paste information which could then be used in reports, to take notes, or for analysis.

EBooks then are textual documents that have been converted and “published” in an electronic format that display on eBook readers, devices or computers using eBook software programs. A modern definition is that an eBook is a digital text file, but not limited to just text, which is displayed on some form of computer or electronic device.

There are estimated to be over 200,000 eBooks available for free online.

A library in every classroom.

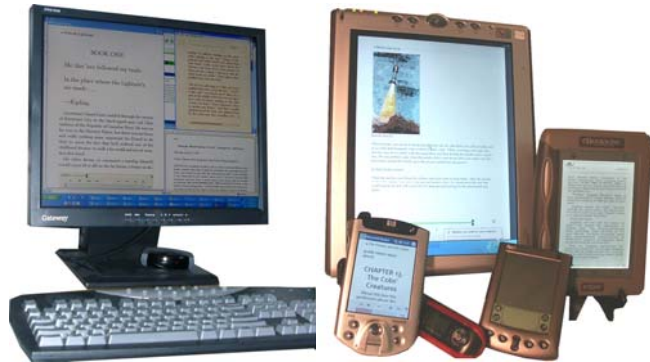

A library in the palm of your hand.

How do eBooks work?

EBooks have three basic components: hardware, software, and the book file. The hardware of an eBook, known as a reader, is a computer style device or a computer running specific software that displays the "book" onto a screen. The software is the program which displays the book data on the device. The eBook file contains all of the "book" material: text, pictures, and what ever else the author can include.

The hardware, software, and file must all be compatible for the book you wish to use. For example MS Reader software can't be used on a Mac computer, while Palm Reader software can be used on a Palm, Mac or Windows device

<i>Features continued</i>					
	Web (.html/.xml)	Text (.txt)	Adobe Acrobat Reader (.pdf)	Microsoft Reader (.lit)	Palm Reader (.pdb)
Adjustable text size	Yes	yes	No (only zoom)	yes	Yes
Display pictures and art	Yes	No	Yes	Yes	Yes
Draw in eBook	No	No	No	Yes	No
Interactive dictionary	No	No	Yes (if online)	Yes	Yes
Remember where last stopped	No	No	No	Yes	Yes
Display	Scro ll	Scroll	Page at a time	Page at a time	Page at a time
2 page display	No	No	Yes	No	Yes

Features

	Web (.html/.xml)	Text (.txt)	Adobe Acrobat Reader (.pdf)	Microsoft Reader (.lit)	Palm Reader (.pdb)
Portable device	Yes	yes	yes	can be used on laptops and Pocket PC devices	can be used on your Palm, PocketPC or laptop
Reader cost	Free	Free	free	free	free
Printing	Yes	yes	often	no	no
Word/text search?	yes	yes	yes	yes	yes
Bookmarking	No	No	Yes	Yes	yes
Highlighting	No	No	Yes	Yes	Yes with Pro version
Note taking	No	No	Yes	Yes	Yes
Text-to-speech	No	No	Yes	Yes	No
Synchronized highlighting with "read" text	No	No	No	Yes	No

What are advantages and disadvantages?

Advantages	Disadvantages
<p>Many eBooks are free or inexpensive.</p> <p>eBook files are relatively small and easily stored and shared.</p> <p>eBook files don't actually weigh anything - just data.</p> <p>eBooks are more interactive than most printed material.</p> <p>eBooks have built in features such as highlighting, note taking, dictionaries, bookmarks and other annotations.</p> <p>eBooks accommodate many learning needs and styles. Most eBooks can read aloud using a text-to-speech engine, and most can also change the text display size making large print available.</p> <p>eBook files can be created using free software, web converters, or MS Word add-ins.</p>	<p>eBooks require a reading device such as a computer or handheld.</p> <p>eBook devices require a power source.</p> <p>Not all books are currently available as eBooks.</p> <p>Users new to eBooks will have a period of adjustment to screen reading.</p>

Ideas for using eBooks in teaching

- Place eBooks or links to eBooks on a course site
- Set up classroom computers with required and enhancement eBooks
- Provide students the option to obtain/purchase eBooks for class text
- Display passages from eBooks during class discussions (digital big book)
- Have students create an original eBook or library from student work
- Create a digital portfolio as an eBook
- Teach students active reading strategies such as using literature circles
