4-Year Curriculum Map for 2020-2021 – Transfer Students

The page represents a flowchart of required courses arranged in vertical boxes. There are 3 wider vertical boxes, the first of which represents a list of transfer courses an incoming student with an AA degree should have completed, the second and third wider boxes represent a year and contains two columns representing two semesters within each year. The two narrower boxes represent summer terms. Semesters are identified by number indicated by labels at the bottom of each column. From left to right:

- The first column lists the transfer courses that an incoming student should already have completed.
- The second column represents Summer 1
- The third column represents Year 1 and contains 2 columns of courses for Semester 1 and Semester 2 respectively
- The third column represents Summer 2
- The third column represents Year 2 and contains 2 columns of courses for Semester 3 and Semester 4 respectively

Each box in the flowchart represents a single course, and contains the course prefix and number, number of credit hours and an abbreviated course title. Lines between the boxes define the relationship between courses (pre-requisite, co-requisite, or non-engineering general education course). A legend is provided to explain how colored lines (red and green) are used to indicate a prerequisite vs co-requisite relationship. The relationship indicated by the lines and their colors fully described below:
