# EMBARGOED UNTIL 5am Thursday, Feb. 17 

# UNF Poll: Polson and Howland in Dead Heat for City Council 

Jacksonville voters want independent panel to draw district maps

The Public Opinion Research Lab at the University of North Florida (PORL) released a new poll of Duval County registered voters of their views on local issues. When asked about the Feb. 22 election for City Council At Large Group 3, Tracye Polson was up by just one percentage point, with $50.3 \%$ of likely voters saying they would vote for her, compared to $49.7 \%$ for Nick Howland. Likely voters include those who said they would definitely vote or already voted in the City Council election, either by mail or early in person.
"It looks like we are dealing with another impossibly tight race for City Council," commented Dr. Michael Binder, PORL faculty director and UNF professor of political science. "Voter turnout is going to be the deciding factor here and predicting that can be tricky-especially in a special election runoff. People with a history of voting in these types of elections lean more toward Howland, so Polson will need to make up for that with new voters in the coming days."

Respondents were also asked about their preferences for the 2023 mayoral and sheriff's races. Potential candidates were included on the list of responses if they have publicly announced running, expressed interest in running, or have otherwise been publicly discussed as possibly running in the 2023 election. Democrat Donna Deegan had the greatest support, with $41 \%$ of respondents saying they would vote for her if the election were held today. She is followed in a distant second by Republican Daniel Davis with $20 \%$ of the vote, and $20 \%$ saying they would vote for someone else.

When asked about the election for Jacksonville sheriff, 39\% said they would vote for Democrat Lakesha Burton if the election were held today, followed by $27 \%$ for Republican T.K. Waters, and $15 \%$ for Matthew Nemeth, also a Republican. For a full list of the candidates listed for mayor and sheriff, please see the crosstabulations at the end of this release.
"Since Matt Carlucci dropped out of the Mayor's race, what was previously an even split has turned into a wide lead for Donna Deegan," commented Binder. "The Sheriff's race is a little bit closer but folks are clearly excited about Lakesha Burton, the first Black woman to run for Jacksonville Sheriff. These are both highly partisan races and it should be noted that this survey is of registered voters-older voters and Republicans are much more likely to turn out in these elections."

Regarding the drawing of City Council district maps, respondents were asked whether they believe that the City Council's elected representatives should draw new maps, or that maps should be drawn by an independent panel made up of an equal number of Republicans and Democrats. The overwhelming majority ( $85 \%$ ) of respondents said they believe maps should be drawn by an independent panel, while just $15 \%$ said City Council. When asked whether they trust City Council to draw districts fairly, $89 \%$ said not very much or not at all, and just $11 \%$ said a great deal or a good amount.
"Given recent challenges to the City Council's redistricting procedures, it's not surprising that folks don't have a lot of trust in the process," noted Binder. "With trust in the Council's process so low, it's no wonder that voters favor an independent panel."

Respondents were also asked about job approval of various local officials. Jacksonville Mayor Lenny Curry had an approval rating of $47 \%$, with $45 \%$ of respondents saying they disapprove of the way he is performing his job and $7 \%$ percent said they don't know. Sheriff Mike Williams fared slightly better with $51 \%$ approval, $36 \%$ disapproval, and $13 \%$ who don't know. When asked about State Attorney Melissa Nelson had $38 \%$ approving, $27 \%$ disapproving and $35 \%$ said they don't know. Jacksonville City Council had the lowest approval rating at just $31 \%$ saying they approve either somewhat or strongly. Fiftyseven percent said they disapprove of the job City Council is doing, and $12 \%$ don't know.
"Job approval of local officials has remained largely steady since the last time we asked, in our JaxSpeaks survey in May 2021," said Dr. Binder. "The biggest change in the past year seems to be an increased awareness, with a lot fewer people saying they 'don't know."

This survey was in the field prior to the Feb. 15 announcement that curbside recycling pickup in the City of Jacksonville would be restored in April of this year, after having been suspended since October 2021. As such, respondents were asked about how important it was for the city to restore curbside recycling pickup. The vast majority ( $83 \%$ ) stated it was important, $63 \%$ indicating it was very important.

In another set of questions, respondents were asked their opinions about renewable energy sources, such as solar or wind power. When asked what percentage of the energy provided by their electric utility should come from renewable sources, most respondents ( $88 \%$ ) thought that more renewable energy should be provided than what is currently provided by JEA, less than $10 \%$. When asked how much more they would be willing to pay on their utility bill to achieve their ideal percentage of renewable energy, the majority (69\%) said they would not be willing to pay more at all.
"Mayor Curry's announcement on Tuesday was very timely considering how important restoration of recycling pickup was to Jacksonville voters," commented Binder. "It is interesting to see that most people think utilities should be using more renewable energy and perhaps more telling for policy purposes, $62 \%$ aren't willing to pay more for it on their utility bill."

In addition to approvals for elected officials, respondents were also asked whether they approve or disapprove of certain Jaguars personnel. When asked about Jaguars owner Shad Khan, 38\% said they approve either somewhat or slightly, down from 48\% in May of 2021. General Manager Trent Baalke had just $12 \%$ approval, with $54 \%$ disapproving and $34 \%$ who don't know. Twenty-nine percent of respondents said they approve of Head Coach Doug Pederson, with 19\% disapproval and 52\% who don't know. Quarterback Trevor Lawrence had the highest approval rating at 56\% approval, with only $16 \%$ disapproval and $28 \%$ unsure.

When asked whether voters support or oppose spending $\$ 1$ billion on a new stadium, to be split between the Jaguars and the City of Jacksonville, most respondents (70\%) expressed opposition, with $53 \%$ saying they are strongly opposed. When they were asked about the importance of having an NFL franchise in Jacksonville, however, 65\% said it is at least somewhat important.
"It's not entirely shocking that Jacksonville voters don't want to foot the bill for a new stadium, especially given the steep price tag and recent on field performance of the team," said Binder. "Even among people who think it's important to have an NFL team, $60 \%$ are still against splitting the $\$ 1$ billion cost of a new stadium."

Respondents were also asked what they think is the most important problem facing Jacksonville. The most common response was crime, at $35 \%$, followed by improving the Downtown area $16 \%$ and improving transportation and infrastructure $10 \%$. Only $3 \%$ of respondents thought that COVID-19 was the most important problem, compared to $22 \%$ in June of 2020. In the "something else" category, affordable housing was among the top issues.

Additionally, respondents were asked their perceptions of the 2020 election, the results of which have been contested in certain states and in the courts. Specifically, respondents were asked their perceptions of who won the election, based on receiving the most votes cast by eligible voters in enough states to win the election. Of the total sample of respondents, $70 \%$ said they thought that Joe Biden won the election, compared to $71 \%$ when the same question was asked in the JaxSpeaks October 2021 survey. Thirty percent said that Donald Trump won the election.
"Crime has historically been the most important problem among Jacksonville voters and that hasn't changed," said Binder. "More people seem to be concerned about affordable housing than in previous surveys, so that could be an issue to watch out for. On another note, it's interesting that despite a lack of supporting evidence, most Republican voters in this survey ( $65 \%$ ) still think Trump won the 2020 election."

## Methodology

The UNF JaxSpeaks February 2022 Poll was conducted by the Public Opinion Research Lab at the University of North Florida from Friday, February 11 through Wednesday, February 16, 2022. The survey was administered through email via Qualtrics, an online survey platform. The email addresses used for this survey were sourced from the December 2021 update of the Florida voter file. The sample frame was comprised of 14,868 registered Duval County voters in Florida, 18 years of age or older. The number of completed surveys was 443 . This study had a $3 \%$ response rate.

The study has an overall credibility interval of $+/-4.7$ percentage points. Credibility interval is used in place of margin of sampling error in this study due to the use of a non-probability sampling procedure. It is important to note that the credibility interval is greater within the smaller subgroups broken down in the crosstabulations. The credibility interval is calculated as:

$$
\bar{y} \pm 1 / \sqrt{n}
$$

Data was weighted by partisan registration, age, race, education, and sex; these weights were created from the December 2021 update of the Florida voter file to match the active registered voters in Duval County. These demographic characteristics were pulled from the voter file list. For the City Council race question, the data was weighted to match the demographics of likely voters, which included people who voted in the 2019 special and runoff elections. Partisan turnout from the December 2021 special election was a key benchmark in the weighting process for the runoff.

All weighted demographic variables were applied using the SPSS version 26 rake weighting function, which will not assign a weight if one of the demographics being weighted on is missing. In this case, respondents missing a response for any of the demographic information were given a weight equal to their weight for the remaining demographics. There were no statistical adjustments made due to design effects. This survey was directed by Dr. Michael Binder, PORL faculty director and UNF professor of political science.

The PORL is a full-service survey research facility that provides tailored research to fulfill each client's individual needs from political economic, social, and cultural projects. The PORL opened in 2001 and is an independent, non-partisan center, a charter member of the American Association for Public Opinion Research (AAPOR) Transparency Initiative and a member of the Association of Academic Survey Research Organizations (AASRO). As members of AAPOR, the PORL's goal is to support sound and ethical practices in the conduct of survey and public opinion research. For more information about methodology, contact Dr. Michael Binder at porl@unf.edu or at (904) 620-2784.

## About University of North Florida

The University of North Florida is a nationally ranked university located on a beautiful 1,381-acre campus in Jacksonville surrounded by nature. Serving more than 17,000 students, UNF features six colleges of distinction with innovative programs in high-demand fields. UNF students receive individualized attention from faculty and gain valuable real-world experience engaging with community partners. A top public university, UNF prepares students to make a difference in Florida and around the globe. Learn more at www.unf.edu.

As you may know, Donald Trump contested the results of the 2020 election through legal challenges in various states and the Supreme Court. These challenges were not successful
Who do you think won the 2020 election - that is, who received the most votes cast by eligible voters in enough states to win the election?
