

The Florida Omnibus Fall Survey - October 5, through October 11

Methodology

The Florida Omnibus Fall Survey was conducted by live callers at the UNF PORL, via the telephone, from 5 p.m. to 9 p.m. daily, October 5, through October 11. The sample of phone numbers was created through the voter file provided by Florida's Division of Elections' September 2017 update and selected through the use of probability sampling among registered voters in the state of Florida in the Florida voter file. Interviews were conducted in English and Spanish by UNF undergraduate and graduate students. Overall, there were 619 completed surveys of Florida registered voters, 18 years of age or older. Of those, 611 had enough demographic data needed for weighting.

The margin of sampling error for the total sample is +/- 3.96 percentage points. The breakdown of completed responses on a landline phone to a cell phone was 27 to 71 percent, with 1 percent refusal. A single interviewer, through hand dialing, upon reaching the specific registered voter as identified in the Florida voter file, asked the respondent to participate, regardless of landline telephone or cell phone. The total sample was then weighted by partisan registration, sex, race, age, and education. Education weights were created from the 2016 American Community Survey (ACS). Partisan registration, sex, race, and age weights were created from the September 2017 update of the Florida voter file to match the active registered voters in Florida. These demographic characteristics were pulled from the voter file list. All weighted demographic variables were applied using the SPSS version 23 rake weighting function. There were no statistical adjustments made due to design effects. This survey was sponsored by the UNF PORL and directed by Dr. Michael Binder, UNF associate professor of political science.

The PORL is a full-service survey research facility that provides tailored research to fulfill each client's individual needs from political, economic, social and cultural projects. The PORL opened in 2001 and is an independent, non-partisan center, a charter member of the American Association for Public Opinion Research Transparency Initiative and a member of the Association of Academic Survey Research Organization. For more information about methodology, contact Dr. Binder at porl@unf.edu or at (904) 620-2784.

In the next couple months, Florida's Legislative session will begin. Please tell me whether you support or oppose the following policy changes in Florida: Prohibiting the
