UNF Procurement Services (1 UNF Drive, Jacksonville FL 32224)

To whom it may concern,

The specification of the equipment in the Arc 200 quotation 02109 is unique to the Arcast product line. The combination of a laboratory scale cold crucible vacuum arc melting furnace with suction casting, gas atomizing, EM stirring and tilt casting is only offered by Arcast Inc. This specific configuration and the advantages this offers are not offered by any other manufacture.

The combined features/options unique to Arcast:

- Atomizer
- Center Suction Casting
- EM Stirring
- Tilt Casting

Arcast Inc. certifies that these product features are unique, and no other manufacture or supplier can supply or offers the combination of these features/options in one system/platform.

Please do not hesitate in asking any questions regarding this equipment and Arcast's capabilities. We look forward to working with you on this and future projects.

With regards,

Sasha Long  
Arcast Inc.
