

One of only two DCN programs in the U.S. | Full- or part-time

Earn your Doctorate in Clinical Nutrition at the University of North Florida

The online Doctorate in Clinical Nutrition is an advanced-practice doctoral program with emphasis on evidence-based practice and chronic disease prevention and treatment in underserved populations in both clinical and community settings. The DCN will prepare practitioners for leadership roles in clinical and community or higher education settings through coursework, advanced practice residency and applied outcomes-based research.

Doctorate in Clinical Nutrition

Admission Requirements

UNIVERSITY REQUIREMENTS

Successful applicants possess the RDN with a minimum of five years practice experience and a master's degree. Applicants without a master's degree, may apply to and complete the UNF master's program prior to entering the DCN program.

Applicants will submit an application letter, three letters of recommendation and official transcripts from all college and/or university coursework with final degree posted. Foreign degrees/transcripts need to have an official evaluation.

See website for additional program requirements.
