

LMS Report- February 2018

Submitted by Ross Bell

Disaster LMS Access – While the LMS data is safe in the cloud, user logins rely upon interaction between the cloud and UNF's servers. The LMS team is working on a plan that would enable administrators to easily switch over to a different login system during campus disasters.

Official UNF Emails and Course Communications – The LMS Team is working with the Registrar and campus communications personnel to craft student messages about official UNF emails and course communications.

Faculty Survey – CIRT will be participating in the upcoming Campus Life Survey with specific questions for faculty about how they prefer to receive and find information about Canvas. We also plan to do follow-up surveying specifically to faculty who have used our services.
